

# Structural Steel Fabrication and Supply

## You know us

As Southern Ontario's most reliable, most value-driven supplier of structural steel and related products, from wide flange beams to angles, from rebar to mesh, to steel deck.

**Today's Armour Steel** is also an integrated fabricator, producing the custom sections and assemblies needed to meet your most challenging structural steel requirements for:

- Low rise commercial structures
- Large residential developments
- Public/institutional buildings
- Light manufacturing facilities
- Multi-unit/hi-rise residential
- Unique, one-of-a-kind projects

## One Source

Your project's entire structural steel scope begins and ends with Armour Steel.

We work with your project team and structural engineers, turning the architect's vision into detailed drawings needed for our in-house fabrication team and site installation.

Using only materials that meet ASTM standards and carry mill test certificates, we bring these designs to life in our well-equipped CWB-certified fabrication shop. Our certified welders assure the quality and accuracy of your fabricated sections and are available for your on-site welding needs as well.

## No detail is too small

We inspect and prime your entire structural steel order, then deliver it to the job site using dedicated Armour Steel delivery trucks. We offer erection and installation services and even take responsibility for the “odds and ends” like stairways, railings, catwalks – items other steel suppliers don’t want to bother with.

## Get the Armour Steel Advantage

**Complete Responsibility** It’s simple – there is one project manager, one phone number, one supplier – to handle all your needs for structural steel, cold formed light gauge steel, rebar, mesh, plate and those “odds and ends.”

**Secure Supply** that’s based on our many longstanding supplier relationships, our commitment to maintaining inventory levels and our single-minded focus on quality.

**Accountable performance** for on-time delivery, putting only certified, capable personnel on your job site and for value in steel that is second to none.
