***The
Armour Steel
Advantage***

June 25, 2010

Hamilton, Ontario - Armour Steel Supply Ltd. has launched a comprehensive new web site explaining the products, applications and advantages of pre-engineered metal building systems (PEMBs). Intended for property developers, building owners and general contractors active in Canada, the web site, www.canadianmetalbuildings.com, explains the design/build process for metal buildings, gives examples of a wide range of structures, and discusses how contemporary PEMBAs can satisfy LEED and other sustainable building initiatives.
